Anne-Sophie's Plan

Project Outputs

What data will you collect, and what research outputs will you create, derive, link to, acquire and/or record?

Question not answered.

Do your research outputs contain Essential Ocean Variables (EOVs) or Essential Climate Variable (ECVs)?

Question not answered.

What file formats will your research outputs be in? Will these formats allow for data re-use, sharing and long-term access to the data?

Question not answered.

Documentation and Metadata

What documentation will be needed for the research outputs to be read and interpreted correctly in the future? Describe how the documentation is captured or updated consistently throughout the active phase of the project.

Question not answered.

If you are using a data or metadata standard and/or tools to document and describe your data, please list here.

Question not answered.

What processes currently exist to continuously improve data quality (reviews, quality flags, testing, verification, etc) throughout and beyond the active phase of the project? Who has the executive responsibility for the quality of the data?

Question not answered.

Storage and Backup

What are the anticipated storage requirements throughout the active phase of the project, in terms of storage space (in megabytes, gigabytes, terabytes, etc.) and the length of time you will be storing it?

Question not answered.

How and where will your research outputs be stored and backed up during the active phase of the research project?

Question not answered.

What collaboration environment and procedures will the research team use to access, modify and contribute data or other research outputs throughout the active phase of the project? How will you organize, name and version-control files in a (shared) directory?

Question not answered.

Preservation

Where and how long will you deposit or archive your data and supplemental materials (i.e. protocols) for long-term preservation and access at the end of your research project?

Question not answered.

Sharing and Reuse

What research outputs will be shared and in what form? (e.g. raw, processed, analyzed, and model).

Question not answered.

Can your data and research outputs be shared with an open license?

Question not answered.

What steps will be taken to help the research community know that your research outputs exist?

Question not answered.

Responsibilities and Resources

Who will be responsible for managing this project's research outputs during and after the project? Please list the data management-specific tasks for which project contributors will be responsible.

Question not answered.

How will responsibilities for managing data activities be handled if substantive changes happen in the personnel overseeing the project's data, including a change of Principal Investigator?

Question not answered.

What resources will you require to implement the management of your research outputs? What do you estimate the overall cost for this to be?

Question not answered.

Ethics and Legal Compliance

Who owns the intellectual property of the research outputs, and how will that person or institution manage legal, ethical, and intellectual property issues?

Question not answered.

Does your project include Indigenous partner involvement, and if so, does it follow the CARE and OCAP Principles?

Question not answered.

If your research project includes sensitive or restricted data, how will you ensure intellectual property rights are protected and that sensitive or restricted data is securely managed and accessible only to approved members of the project, during the active phase of the research?

Question not answered.

If applicable, what strategies will you undertake to address secondary uses of sensitive data?

Question not answered.
